Duality and NTT DATA revolutionize privacy enhanced secure data collaboration

By Contributor Wed 27 Apr 2022

Our new global economy has exponentially grown our digital footprint, and for many organisations maximising on the value of the critical, yet sensitive data they are collecting is paramount.

As one of the foremost global digital business and IT services leaders, NTT DATA, in conjunction with NTT Innovation Laboratory and Duality Technologies, combined their goals and expertise to evaluate the use of sensitive multisource data, while ensuring privacy is maintained.

"In working with Duality, we are able to leverage the data in our extended client and partner networks to open new lines of business in a variety of industries - all for the greater good of our customers, without infringing on their privacy or their rights."

Hiroyuki Yamanaka, NTT, manager, Data Secure Team.

Why data science is crucial to your organization

Expertise and partnerships that drive decision-making

NTT's data-science capabilities are based both on our internal teams and platforms (best showcased in our work with the [Tour de France](#)) and on the partnerships facilitated by NTT Innovation Lab Israel with other leading organizations in this field, such as [SparkBeyond](#), to create a robust analytical foundation and drive intelligent decision-making in your organization.
